TARIK SOĞUKPINAR

Backend Developer | TypeScript & Node.js & Golang | Scalable Systems | Real-Time Tracking Platforms

contact@tariksogukpinar.dev • me.tariksogukpinar.dev • Turkey, Istanbul

Summary

Backend Developer with 4 years of experience in backend and occasional full-stack development, specializing in **TypeScript** and **Node.js**. Proven expertise in designing and maintaining **RESTful APIs** for global monitoring and data protection platforms, as well as refactoring backend systems to improve maintainability. Skilled in ensuring system scalability and performance using tools like **Docker**, **Linux**, **Redis**, **Nginx**, and **Elasticsearch**. Looking to contribute to **DveB's mission** by applying my backend development skills to support the delivery of creative and performance-driven digital experiences.

Experience

MonoPayments — www.monopayments.com
London, United Kingdom
Software Developer
2025 - Present

MonoPayments is a white-label fintech platform offering modular solutions like digital wallets, IPG, KYC/KYB, and neobanking for financial, governmental, and retail sectors.

- Developed backend services using Golang for payment systems
- Built and maintained APIs used by MonoPayments and partner companies
- Focused on performance, security, and scalability of financial services
- Worked closely with teams to deliver reliable fintech solutions

Perwatch — www.perwatch.com
Delaware, United States
Backend Developer
2025 - 2025

Perwatch is a cybersecurity and monitoring technology company that enables businesses to track employee performance and data security through a single platform

- Developed and maintained **RESTful APIs** using **Node.js** (Express.js, Nest.js) and **Golang** (Fiber), supporting scalable and secure enterprise applications.
- Contributed to a **global monitoring and data protection platform**, enabling real-time tracking of employee activity and critical file movements.
- Utilized **Docker**, **Linux**, **Redis**, **Nginx**, and **Elasticsearch** to ensure system scalability and performance
- Refactored legacy codebases to improve maintainability, resulting in reduced technical debt and faster feature delivery cycles.
- Technologies used: **TypeScript**, **JavaScript**, **Golang**, **Node.js**, **Nest.js**, **Express.js**, **Next.js**, **MongoDB**, **Elasticsearch**, **Redis**, **Docker**, **Linux**, **Nginx**.

Microprefix — www.microprefix.com
Konya, Turkey
Backend Developer
2024 - 2025

Micro Prefix is a software company that provides system management solutions for enterprise needs and develops specialized software for the healthcare and education sectors.

- Built and maintained backend services using **TypeScript (Nest.js, Express.js)** and **Next.js** for frontend components
- Improved system performance and scalability by optimizing backend infrastructure with **Docker**, **Linux**, **Redis**, **Nginx**, and **Elasticsearch**.

Teklif Software — www.teklifgroup.com
Konya, Turkey
Full stack developer
2023 - 2024

Teklif is a software company that develops digital solutions and web-based platforms for the education sector.

- Improved educational platform reach by {30%} by enhancing backend and frontend capabilities for Dersgo.com.
- Full-stack development using **Nest.js**, **Next.js**, **Express.js**, **Elasticsearch**, and **Docker**.
